

January 30, 2023

YUKIO NAGASAKI

Professor
Department of Materials Sciences,
Faculty of Pure and Applied Sciences
University of Tsukuba
Tennoudai 1-1-1, Tsukuba, Ibaraki 305-8573, Japan

Tel: +81-29-853-5749
Fax: +81-29-853-5749
e-mail: happyhusband@nagalabo.jp

PERSONAL: Born Aug. 11, 1959, Married, 1 Child

EDUCATION: 1987 Ph.D., Department of Industrial Chemistry, Science University of Tokyo, Shinjuku, Tokyo, Japan
Synthesis of New Monomers, Oligomers and Polymers by Using Novel Reaction Route -Approach from Seeds Discovering-
1982 B.A., Department of Industrial Chemistry, Science University of Tokyo, Shinjuku, Tokyo, Japan

DISTINCTIONS

Fellow, the Society of Polymer Science, Japan (2021)
Fellow, Biomaterials Science & Engineering, Society for Biomaterials (2020)
Top 20 faculty members in University of Tsukuba (2018)
Top 20 faculty members in University of Tsukuba (2017)
The Award of the Society of Polymer Science, Japan (2017)
15th Japan DDS (Drug Delivery System) Society NAGAI Award (2015)
The Award of the Japanese Society for Biomaterials (2014)
The Award of The Japanese for Ulcer Society (2014)
SPSJ Mitsubishi Chemical Award, 2010
The Award for Encouragement of Research in Polymer Science; The Society of Polymer Science, Japan (1995)
Inoue Foundation Award for Distinguish Ph.D. Thesis, 1990
Scholarship of The Japan Scholarship Foundation, 1982-1987
Scholarship of Kosaikai, 1978-1982

EXPERIENCE

Adjunct Professor Department of Chemistry, Graduate School of Science, The University of Tokyo, 2022-present
Principal Investigator, Center for Research in Isotopes and Environmental Dynamics, University of Tsukuba, Tsukuba 305-8573, Japan, 2013-present
Principal Investigator, Strategic Initiatives (Project type), University of Tsukuba, 2011-2014
Principal Investigator, International Center for Materials Nanoarchitectonics Satellite (MANA), National Institute for Materials Science (NIMS), University of Tsukuba, 305-8573, Japan, 2007-2017
Adjunct Professor, Master's School of Medical Sciences, Graduate School of Comprehensive Human Sciences, University of Tsukuba, 305-8573, Japan, 2007-present
Honorary Professor, Polyscale Technology Center, Tokyo University of Science, Noda 278-8510, Japan, 2006-2011
Project Leader, Nagasaki Project, Nanology Aspect, Tsukuba Advanced Research Alliance, University of Tsukuba, Tsukuba 305-8573, Japan, 2006-2011
Principal Investigator, Tsukuba Research Center for Interdisciplinary Materials Science, University of Tsukuba, Tsukuba 305-8573, Japan, 2004-2011
Professor, Department of Materials Science, Graduate School of Pure and Applied Science, University of Tsukuba, Tsukuba 305-8573, Japan, 2004-present
Director, Nano-chemistry Division, Research Center for Nano-science and Technology, Tokyo University of Science, 2002-2004
Researcher, Research Center for Applied Materials, Tokyo University of Science, 2000-2004
Professor, Department of Materials Science, Science University of Tokyo, Noda 278-8510, Japan, 2003-2004
Associate Professor, Department of Materials Science, Science University of Tokyo, Noda 278-8510, Japan, 1999-2003
Assistant Professor, Department of Materials Science, Science University of Tokyo, Noda 278-8510, Japan, 1994-1999
Visiting Researcher, Department of Polymer Science and Engineering, University of Massachusetts, Amherst, MA 01003, U.S.A., 1992-1993
Research Associate, Department of Materials Science, Science University of Tokyo, Noda 278-8510, Japan, 1989-1994
Research Associate, Department of Industrial Chemistry, Science University of Tokyo, Shinjuku, Tokyo 162, Japan, 1987-1989
A part-time lecturer, Toyo Junior College, Bunkyo, Tokyo 112, Japan, 1986-1987

RESEARCH INTEREST

His research interest covers the creation of new functional materials via novel polymerization techniques. End-functionalized poly(ethylene glycol)s as a surface modification agent and novel nanoparticles as intelligent drug vehicles are his main target for new materials design. He is also interested in the creation of high-performance biointerface, including non-fouling and specific bio-recognition characters. He found that

poly(ethylene glycol) tethered chain surface having a mixture of long and short chain lengths reduces non-specific protein adsorption almost completely (Uchida, et al., *Ana.Chem.*, 77, 1075, 2005). Antibody/PEG co-immobilized surface increased reactivity of the surface antibody with the increasing PEG tethered chain density (Nagasaki, et al., *J.Coll.Int.Sci.*, 307, 524, 2007). This immunochemical enhancing effect is a promising phenomenon for the creation of a high-functionality surface of versatile biomaterials. Recently, he has been developing nitroxide radical-containing nanoparticles (RNP), which have the scavenging ability of reactive oxygen species (ROS) to reduce oxidative stress activity (Yoshitomi, et al., *Bioconjugate Chemistry*, 20, 2792(2009)). Using RNP, ROS damage by cerebral ischemic-reperfusion is effectively reduced (Marushima, et al., *Neurosurgery*, 2011). RNP is also effective not only for Alzheimer's disease model but also for cancer, gene therapy and ulcerative colitis. Anti-inflammation by nanoparticles is very promising. Recently, they started to investigate the relationship between intestinal condition and brain/body health by their nanoparticle-type antioxidants and post-biotics.

KEYWORDS

Drug Delivery System / Nanomedicine / Biomaterials / Polymer Chemistry / Bioconjugate Chemistry/ Self-assembling drug development

EDITORIAL ACTIVITY

electric Journal of Soft Materials, The Society of Rubber Industry, Japan, Editorial Board, 2005-2012

Reactive and Functional Polymers, Elsevier, Advisory Board, 2007-present

Bulletin of the Chemical Society of Japan, CSJ, Editorial Board, 2010-2013

Biointerphase, American Vacuum Society, Editorial Board, 2010-2015

Acta Biomaterialia, Elsevier, Editorial Board, 2010- present

Biomaterials, Elsevier, Handling Editor, 2014- present

Journal of Clinical Biochemistry and Nutrition, Editor, 2016- present

MEMBERSHIP OF PROFESSIONAL SOCIETIES:
